USER MANUAL

By : QoL Development Team

Table of Contents

1. Starting the App

In order to start the app you must first locate the location of the app in your mobile phone, most android phones have them sort alphabetically but in the case that it is not here's what the app icon looks like.

Clicking on the app icon will launch the app and you will be presented with a splash screen as the app initialises.

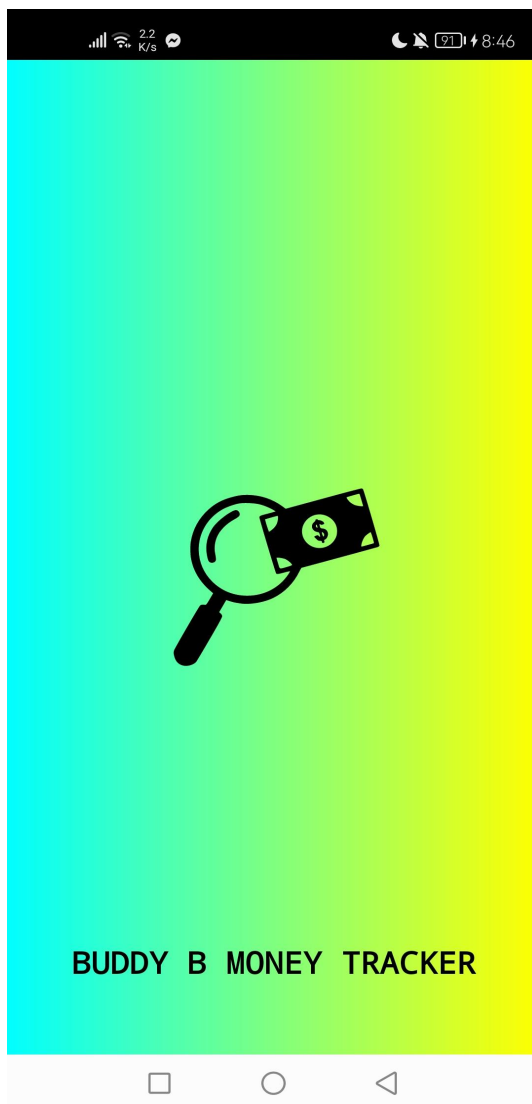

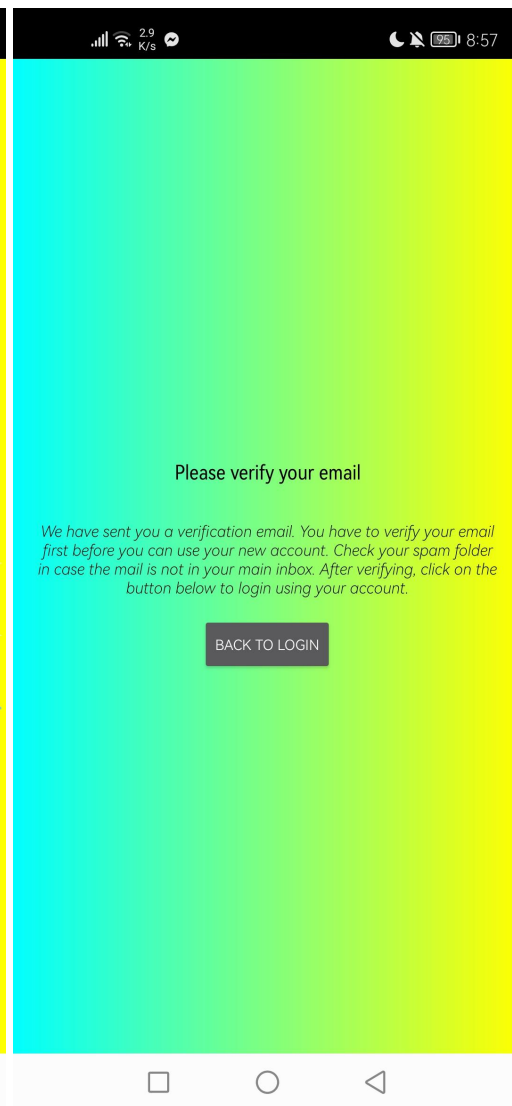

2. **First Time Login/ Register**

If you have not yet used the app you will not be able to use the application's login feature without registering for an account first.You can click the *"Don't have an account? Sign Up!"* Button to re direct you to the registration screen.

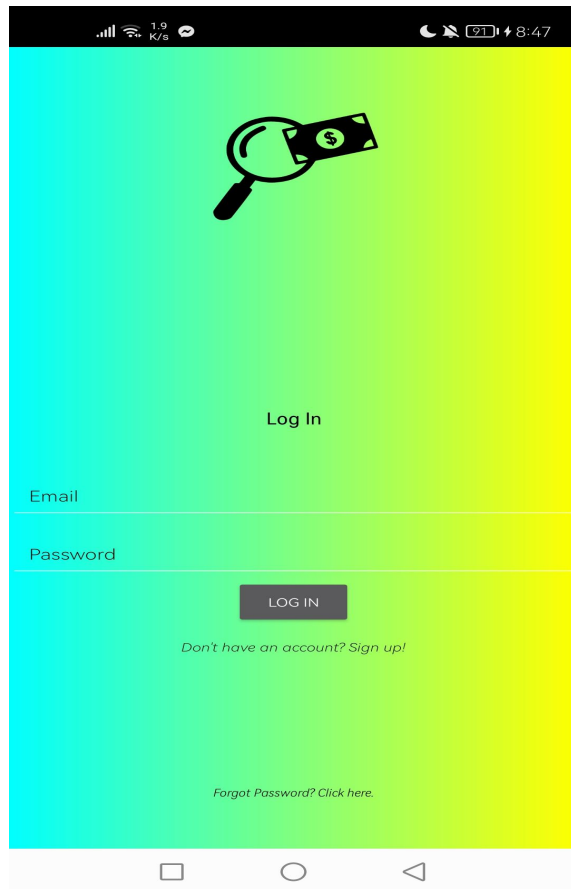

On the Registration Screen you are prompted to Enter an email and a password used to access your account. When you input the required information a verification email will be sent on the email you provided.

Please verify your email

*We have sent you a verification email. You have to verify your email
first before you can use your new account. Check your spam folder
in case the mail is not in your main inbox. After verifying, click on the
button below to login using your account.*

BACK TO LOGIN

3. Verifying your account

In order to use the app and be able to login you need to have the email account verified. Once you have completed the steps beforehand an email will be sent to the account that you are using.
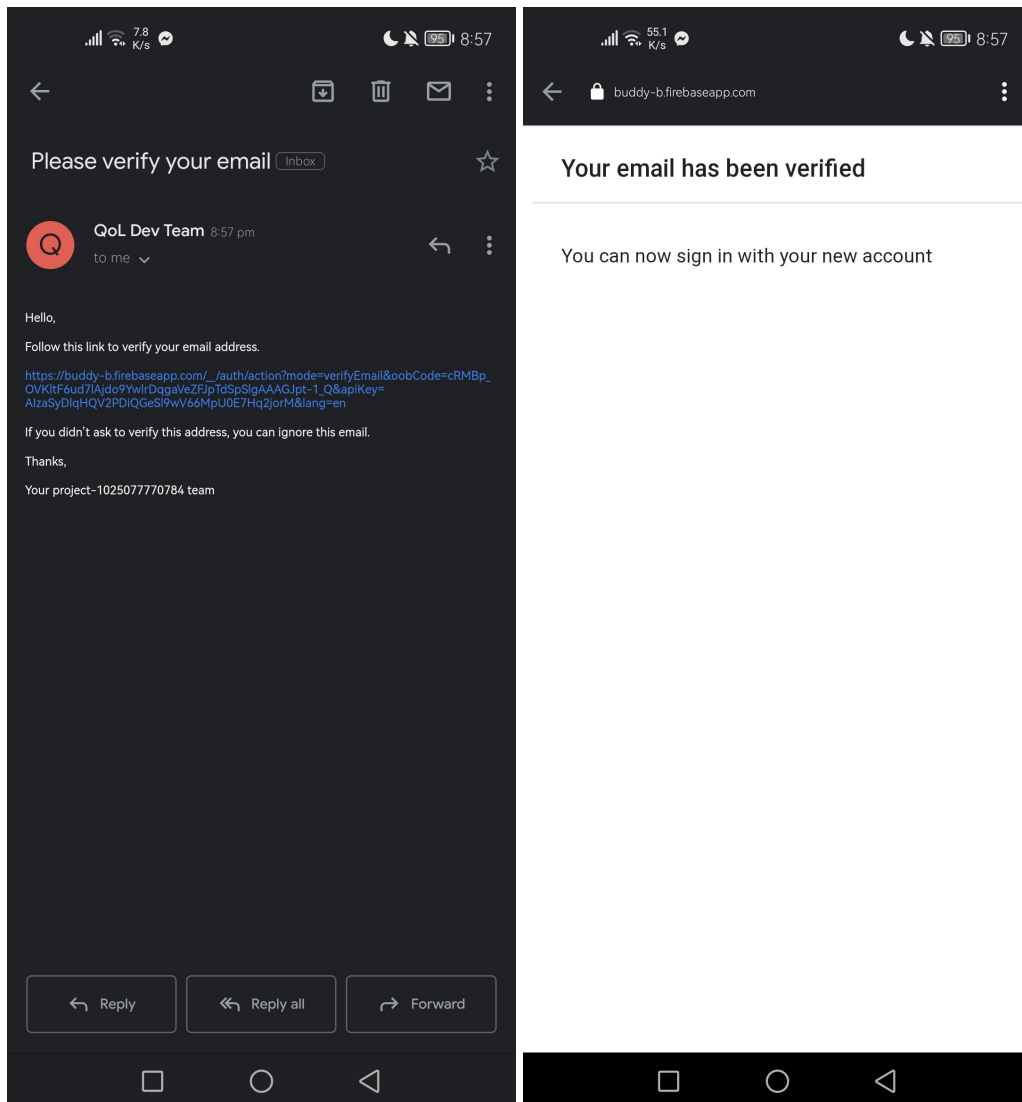

Once you click the email and clicked the link inside your email is now active and can be used on the app.
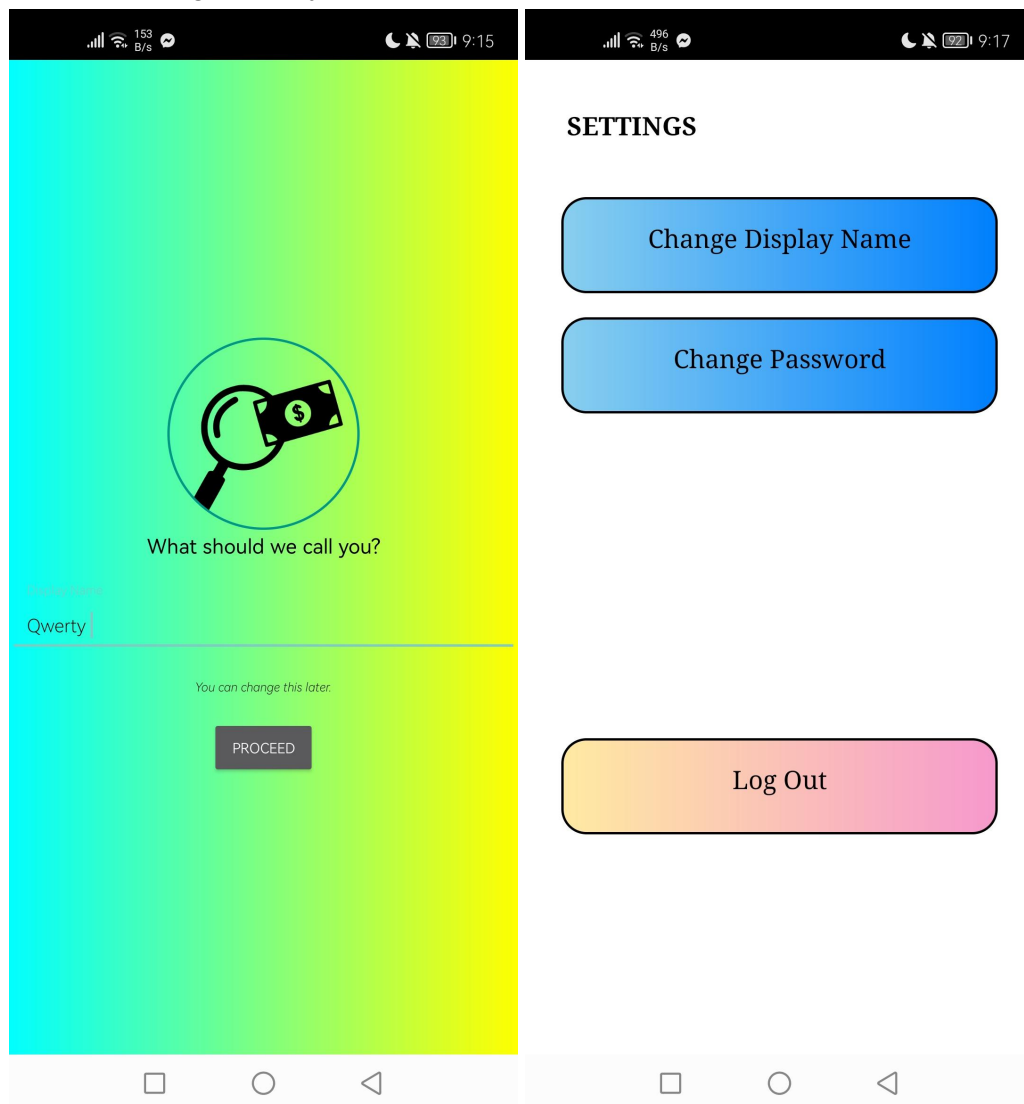

4. Resetting your password

In the case that you forgot your password you can simply reset it by using the forgot function on the login screen or ny clicking the gear icon on the home screen and clicking the change password option.
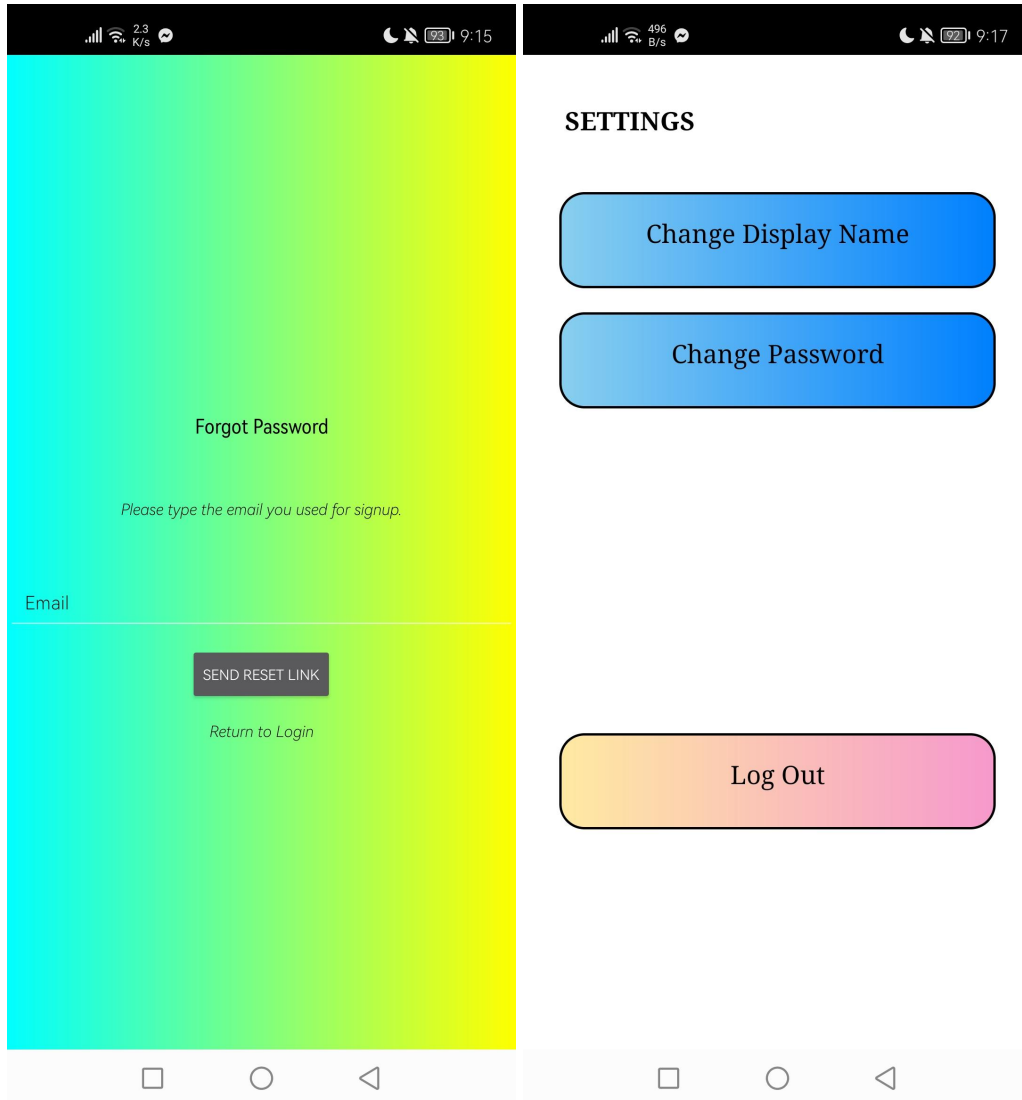

5. Configuring your display name

Upon first account creation you will be prompted to enter a display name. A display name is used to identify a user and for you to know what account is logged in. In order to create or edit a display name you can click the gear icon on the home screen and click change display name.

What should we call you?

Qwerty

You can change this later.
